

Facilis Technology's TerraBlock 2.0 Included in AJA 2K Digital Intermediate Workflow Demonstration at NAB 2006

Demonstration of Complimentary Products For 2K/4K and SD/HD Workflow

NAB 2006, Las Vegas, NV, April 24, 2006 – Facilis Technology will participate in demonstrations of 2K Digital Intermediate workflow at NAB using AJA's KONA 3 and XENA hardware with Facilis Technology's TerraBlock 2.0. Together, these products represent a powerful environment for film and high-bandwidth video finishing.

Demonstrations will take place at NAB 2006, April 24-27 in Las Vegas, at Booth SL4913 and SL1600.

"There is great synergy between AJA's product lines and the Facilis TerraBlock, and we're pleased to offer real-time demos at NAB 2006," said Nick Rashby, director of sales and marketing, AJA. "These systems give post-production facilities a robust hardware solution for 2K/4K and SD/HD workflow enhancements and give editors and producers full scalability and flexibility at affordable prices."

Facilis Technology's TerraBlock 2.0 is ideal for uncompressed SD/HD and 2K DI workgroups, as are AJA's product lines. In TerraBlock 2.0, "Tandem" spanned volumes increase available bandwidth by as much as four times, and the new Dyna-RAID technology allows users to dial-in different levels of data protection on a per volume basis, including Parity RAID5.

"After hearing how well Facilis and AJA systems combined in the field, we were happy to be included as a preferred SAN storage for AJA's flagship products," said Jim McKenna, vice president of marketing at Facilis Technology. "A significant portion of our customer base has integrated AJA's products into TerraBlock environments, creating complete solutions with excellent price-performance and flexibility."

About AJA Video Systems, Inc.

Since 1993, AJA Video has been a leading manufacturer of high-quality and cost-effective digital video interface, conversion and Desktop solutions supporting the professional broadcast and post-production markets. With headquarters in Grass Valley, California, AJA maintains an extensive sales channel of dealers and systems integrators around the world. For further information, please see www.aja.com.

About Facilis Technology

Facilis Technology, Inc. designs and builds high-capacity, turnkey storage area networks for the post-production field. The company delivers cost-effective, high-bandwidth storage solutions that facilitate a more efficient workflow for content creators in HD, broadcast, graphics and animation industries.
